

Environmental Policy

1. As a manufacturer of chemical products, Belinka Perkemija has defined 'concern for the environment' as an important part of company policy.
2. All planning and activities are managed and implemented in such a way as to prevent pollution and to limit and as far as possible eliminate all negative environmental effects. On the basis of internal and external factors, we regularly assess risks and look for opportunities.
3. For many years the business policy of Belinka Perkemija has been the development, production, and marketing of products and services that are environmentally friendly, or solve the environmental problems of others. When designing new products, we determine the impact of raw materials, packaging, products, and processes, on the environment.
4. We carry out our activities in accordance with applicable legislation and other agreements related to our important environmental aspects. We are working to reduce negative environmental impacts more than required by legislation. Actively we support the European green deal and act in terms of energy efficiency and reducing carbon footprint.
5. The management system is monitored by regular control measurements and periodic inspections to check efficiency and on-going progress.
6. We only introduce new technologies suitable for the environment, which optimize existing processes and technologies.
7. Our employees and partners are informed about our environmental policy and objectives through the publication on the Intranet and Internet. All employees and partners, educate, train and motivate them for an active relationship with the environment in order to know all of our environmental policies. Require them to comply with guidelines in the joint operation.
8. We communicate with our neighbours and the public completely openly. Our environmental policy, objectives, and information concerning the environment, is available to all, to create a spirit of trust.
9. We commit ourselves to consistent implementation of our environmental policy as an integral part of company development and the expectations of the local community and society.

Ljubljana, February 2021

France Stele, Managing Director

Belinka Perkemija, d.o.o.
