

Quality policy

1. Belinka Perkemija operates in the field of peroxide compounds.
2. Our priority is the development of quality products and services, with quick responses to the needs of the market and the concern for our customers' satisfaction.
3. Our growth is conditional on the consolidation of the position of the existing customers, expansion of connections and new markets. We are globally looking for business opportunities.
4. Customers as well as suppliers and owners are our strategic business partners. Our cooperation with them is based on the needs of our company, but we act by the code of conduct and consider the business interests of all parties involved. This contributes to the quality of our products and services and builds long-term strength of the business. We are also looking for long-term development projects.
5. With the system of continuous improvement, assessment, prevention of risks and looking for opportunities, and management of purchasing and production costs, we ensure sales department competitiveness and improve the satisfaction of our partners. This is achieved by connecting to the most appropriate organization within the KANSAI HELIOS Group.
6. Belinka Perkemija's human resources policies are built in accordance with the requirements of the market and business opportunities so that employees are motivated and can demonstrate their skills and creativity. Special attention is put on employee training that encourages innovation and continuous improvement.
7. Belinka Perkemija conducts business following legislation and continues to pay particular attention to business safety and the environment. We are dedicated to doing business following the requirements of ISO 9001 and 14001. We also provide the highest A1-rated payment, so we can continuously strengthen trust and upgrade good partnership relations.
8. A 'Quality' policy is a commitment for all company employees. It is published on the internet and intranet to inform all the employees and all those acting on behalf of the company.
